- 2020 to 2021, Pupil, IKM Advocates, DLA Piper Africa member firm in Kenya

Insights

Will new regulations deliver Kenya carbon credit trade promises?

8 May 2025

Could carbon projects be like that puffy 'mandazi' that you bite into and discover that it was a pocket of air? This is arguably the case, for some communities in Kenya whose high hopes for carbon credits have been dashed.

Enhancing Kenya's carbon markets penetration

8 October 2024

Kenya is no stranger to carbon trading. In fact, the Berkeley Carbon Trading Project Voluntary Registry Offsets database ranked Kenya as the second-largest issuer of voluntary carbon market credits in Africa in 2022, trailing the Democratic Republic of Congo.

Roadmap for successful public, private partnerships on water

21 September 2023

The Kigali Bulk Water Supply (KBWS) project is an exemplar of a successful water PPP. It was established by the Africa Water Infrastructure Development (AWID) platform, which is a joint venture between BII and Metito. It is a pioneering model for the financing, construction and operation of a 40,000 cubic meters/day bulk water facility with a concession term of 27 years.

Why the emissions trading system is crucial for Kenya

15 February 2022

The call to take action against global warming is only getting louder, driven by the havoc in countries which have been on the receiving end of erratic weather patterns that endanger human life as well as property and adversely impact economies. The clarion call is for all countries to join forces to reduce emissions and keep global warming below the 1.5 degree celsius target which portends catastrophic effects if exceeded.

Why sustainability and ESG are critical for firms

7 September 2021

The terms 'Sustainability' and 'ESG or Environmental, Social and Governance' run the risk of becoming mere buzzwords in today's green-minded world. Worse still, these terms are often used interchangeably when they do not quite mean the same thing. Sustainability is an umbrella term that encompasses all of an organisation's efforts to be a responsible steward and includes the three specific ESG pillars that are measurable, as they are data driven.
